

Association Activity – Poster Presentation

Date : 22.08.2025

Organized by : Department of Computer Applications

Academic Year : 2025-26

Report :

The Department of Computer Applications organized a Poster Presentation on “The Role of Computer Applications in Disaster Management”. The event aimed to highlight how technology helps in predicting, managing, and reducing the impact of disasters. Students showcased their creativity through informative and attractive posters. A total of 30 UG students actively participated in the event. Posters explained the use of GIS, data analytics, and AI in disaster prediction. Students demonstrated how computer applications support rescue and relief operations. The activity encouraged teamwork and research among the participants. Judges evaluated posters based on creativity, content, and presentation.

The session provided valuable insights into real-world technology applications. Participants displayed great enthusiasm and innovative ideas. The event helped enhance awareness about disaster preparedness. It motivated students to explore technology for social good. Certificates were given to the best-performing students.
