

Event Name: Capacity Building Program: Series 1 – Personalizing education: Assessing learners' types in higher education.

Date: 26.09.2025

Organized by: Internal Quality Assurance Cell (IQAC)

Academic Year: 2025-2026

Report:

Internal Quality Assurance Cell (IQAC) organized a Capacity Building Program titled “**Personalizing Education: Assessing Learner Types in Higher Education**”, aimed at equipping faculty members with strategies to understand learner diversity and enhance classroom effectiveness. The session was led by **Dr. Bikramjit Basu**, Director of IQAC, Don Bosco University, Assam, who served as the resource person. Dr. Basu provided an insightful overview of various learner types commonly found in higher education settings and discussed the importance of recognizing individual learning preferences for improved academic outcomes. He highlighted contemporary approaches for assessing cognitive, behavioral, and motivational differences among learners and demonstrated how these assessments can inform personalized teaching strategies. The session included interactive discussions and practical examples, allowing participants to reflect on their own teaching practices and explore adaptable methods for inclusive classroom engagement. Dr. Basu emphasized that meaningful personalization not only enhances student participation but also contributes to better retention, comprehension, and academic growth. Faculty members responded positively, appreciating the relevance and depth of the session. The program reinforced the institution's commitment to continuous professional development and to fostering a learner-centered educational environment.
