

Event Name: International Conference on Frontiers in Material Science for a Sustainable Future (ICFMSSF'25)

From Date: 17.09.2025

Organized by: PG & Research Department of Physics

Academic year: 2025

The International Conference on Frontiers in Material Science for a Sustainable Future (ICFMSSF'25), jointly organized by the PG and Research Departments of Physics and Chemistry on 17th September 2025, was a landmark event that brought together academicians, researchers, and students from across the globe. The conference served as a dynamic platform for global academic and research exchange, encouraging discussions on cutting-edge innovations in material science and sustainability. Renowned international experts delivered insightful keynote addresses on emerging areas such as nanomaterials, energy storage devices, green chemistry, and advanced functional materials. Their lectures provided valuable perspectives on how material science can contribute to building a sustainable and energy-efficient future. The conference also featured paper and poster presentations, where research scholars and students showcased their innovative studies and experimental findings. These sessions fostered an atmosphere of collaboration and intellectual curiosity, bridging the gap between fundamental science and technological applications. The event was marked by enthusiastic student participation, interactive Q&A sessions, and thought-provoking discussions that inspired young researchers to pursue interdisciplinary approaches. The organizers emphasized the importance of sustainable research practices and global cooperation in addressing environmental challenges. Overall, ICFMSSF'25 successfully promoted interdisciplinary collaboration, research excellence, and innovation, leaving a lasting impact on all participants and reaffirming Auxilium College's dedication to advancing science for a sustainable future.
