

ChemSphere

The Domain Club of the Department of Chemistry

“Where Curiosity Reacts with Creativity”

Objectives:

- To enhance students' understanding and appreciation of chemical sciences.
- To provide opportunities for students to present and discuss their ideas through debates, paper presentations, and group discussions.
- To develop scientific temper and analytical skills through quizzes, exhibitions, and poster sessions.
- To engage students in creative expressions of chemistry through drama and innovative presentations.
- To serve as a bridge between classroom learning and real-world chemical applications.

Through ChemSphere, the Department of Chemistry envisions a stimulating environment where knowledge meets creativity, and curiosity fuels innovation. The club continues to inspire students to explore, experiment, and excel — upholding the true spirit of scientific learning and discovery.
