

Auxilium College (Autonomous), Vellore- 6
Department of Microbiology (Shift – II)
Innovative Intrapreneurship
2021-2022

Programme: Analyzing the quality of air and water - Auxilium College

Date: 21.11.2021 to 29.11.2021

Two procedures - The settle plate technique and Most Probable number technique were performed for analyzing/ checking the quality of air and water samples respectively for various locations of Auxilium College campus between 21.11.2021 to 29.11.2021.

The water in Auxilium campus collected from different location had less microbial load that revealed maintenance of standard chlorination protocol with Standard Operating Procedures and guidelines.
