ABOUT LATEX

LaTeX is a powerful typesetting system widely used for creating professional documents, especially in academic and research fields. It is the standard tool for writing research papers, thesis, dissertations, books, and presentations that involve complex mathematical equations, scientific notations, and structured formatting. Unlike word processors, LaTeX ensures high-quality output with precise control over layout, references, tables, and graphics.

This workshop will help participants gain hands-on experience with LaTeX, enabling them to prepare error-free, publication-ready documents with ease and efficiency.

- No Registration Fee.
- Open to PG students and Research scholars.
- E-Certificate will be provided.

- Only 60 registered participants can be accommodated.
- Selection of registered participants will be 'first come first serve basis'.
