

Event Name: Seminar on Entrepreneurship and Innovation in Life Sciences

From Date: 14.08.2025

Organized by: Department of Microbiology in association with Auxilium,
Innovation & Incubation Centre

Academic Year: 2025 - 2026

Report: The Seminar aimed to provide practical insights into entrepreneurship in the life sciences sector, familiarize students with government support for biotech start-ups, and inspire innovative solutions in healthcare, agriculture, biotechnology, and environmental sustainability. The interactive session enhanced students' awareness of entrepreneurial opportunities, government schemes, resource utilization, and networking avenues. The Outcome of the session is that the students gained a clear understanding of entrepreneurship in life sciences, explored funding and incubation support, and were motivated to pursue innovation-driven careers beyond research, including product development and business leadership. The session successfully fostered an entrepreneurial mindset and broadened career perspectives.
