

Event : Internship Reflection and Presentation

Date : 27/07/2026

Organised by : PG & Research Department of Physics

Academic Year : 2026 – 2027

Report :

The PG & Research Department of Physics, Auxilium College (Autonomous), Vellore, under PHYSICOS, organized an Internship Reflection and Presentation programme on 27 July 2026 at the Admin Block.

The programme was organized to provide students with an opportunity to reflect on their internship experiences and share the knowledge, skills, and practical exposure they gained during their internship period. The session aimed to bridge the gap between classroom learning and practical applications by encouraging students to communicate and present their internship experiences.

During the programme, the students presented their internship experiences, highlighting the nature of the work undertaken, the concepts and techniques they learned, and the practical skills they acquired. The presentations enabled the students to critically reflect on their learning and understand how theoretical knowledge gained in the classroom can be applied in real-world and professional environments.

The session also helped students develop important skills such as presentation, communication, teamwork, critical thinking, and professional interaction. The reflections shared by the students provided useful insights into the different learning opportunities and challenges encountered during their internships.

The programme created an interactive academic environment where students could share their experiences with their peers and faculty members. The presentations also encouraged students to explore further opportunities for practical training, research, and career development.
